We Are Giving a Pretty Good Imitation of That Story in America Now.
(Paraphrase, 1997, in *American Journal of Economics*)

The people of the United States, we judge, are going to find out that a bear with a rock, and with considerable more self-confidence than judgment, doesn't make the very best kind of a fly killer.

For instance, in California the Standard Oil Company forced the Southern Pacific to refuse to haul oil cars from the Kern River district tidewater because the Standard Oil wished to purchase the wells at one-third of their value. That is a fair sample.

shop." The phrase "closed shop" is not well known. Please correct it. Since shop is probably what you meant. "Closed shop" is a through-going term. It means a union labor party, or one of its henchmen, is in control of the shop. The Bureau of Statistics of Labor will inform you, if you choose to procure it, that it is a very common thing. It is a very bad idea that was well known, since 1890, as union shop. The idea of closure in America is a very bad thing. It is a cover for the patriots.
